

HAVE YOU GOT WHAT IT TAKES?

Are you ready to take the challenge of working in our R&D laboratory?

PROJECT TRAINEESHIP

As a manufacturer of specialty chemicals for the construction industry, Sika invests heavily in its Research and Development teams and its Global Technology Centers.

We are now looking for a trainee for the chemical, analytical, and rheological characterization of concrete admixtures in the mortar and concrete field at our lab in Calusco, Italy.

WE NEED YOUR EXPERTISE

The successful candidate will verify - through chemical, physical and technological techniques - the influence of different materials on the rheological characteristics of mortar and concrete mixes. Testing will be performed on raw materials, ready to use products, and competitors' products with the aim to gain and compare the relative performance indexes.

MAKE A DIFFERENCE

At Sika we offer intensive training and interesting perspectives for anyone who takes on the challenge. We encourage you to take responsibility for your work and we nurture the pioneering characteristics of Sika. If you're ready to make a difference contact us on barbieri.francesco@it.sika.com

ARE YOU...

- A graduate with a BS, MS or PhD in environmental, industrial or chemical engineering, or a related field?
- Fluent in English? (Italian is a benefit)
- Someone with strong verbal, written, and analytical skills and the ability to interact effectively with all levels of employees and management?
- Self-motivated, goal-oriented and driven towards continuous improvement?
- Open to international experiences?

THEN WE NEED YOU.
