NEW CONSTRUCTION OF CAR DEALERSHIP "GARAGE ATLANTIC AG" AND
CAR REPAIR SHOP "GARAGE CARROSSERIE CENTRA AG"

BUILDING TRUST

CAR DEALERSHIP AND CAR REPAIR SHOP IN GAMSEN, SWITZERLAND

PROJECT DESCRIPTION

The newly built car dealership "Garage Atlantic AG" on Industriestrasse 32 in Gamsen is one of the most modern garages in the Upper Valais. The car repair shop "Garage Carrosserie Centra AG" is the only all-in-one service provider in this area. In the offices, the workshop area and the car wash sites of both shops, a visually appealing, highly resistant and easy to maintain floor had to be installed.

PROJECT REQUIREMENTS

- High wet abrasion resistance and water resistance in car wash facilities
- High chemical resistance against fuel etc. in the repair shops and car wash facilities
- Tiling has to withstand high compression and shear stresses due to braking and starting vehicles
- Aesthetic flooring in exhibition rooms
- Minimum downtime

SIKA SOLUTION

The tile grout SikaCeram® EpoxyGrout is highly resistant against chemicals and mechanical stress. Sika Permat decoupling mat allows for crack-free covering also when driving over with cars. By using the flexible and

rapid hardening tile adhesive SikaCeram®-252 Flex Rapid, the decoupling mat was already open for traffic after 3 hours. SikaCeram®-502 TG Flex was used for the cementitious grouting, which makes the floor in the exhibition room visually appealing.
