BUILDING TRUST

RAGAB SCHOOL COMPLEX IN ALEXANDRIA

PROJECT DESCRIPTION

Ragab School Complex is one of the newest educational projects in Alexandria, with a special design and theme. The school accepts student starting from early age and educates them till High School. Three schools form one big complex: K.G School on an area of around 10,000 m², EL Kada Secondary School on an area of around 24,000 m² and finally EL Forsan School on an area of around 20,000 m².

PROJECT REQUIREMENT

Tile adhesive suitable for indoor and outdoor applications, for fixing tiles on facades all over the school. Tiles were produced by Restic Tiles using new technology.

Special Requirements

To use a tile adhesive of high performance and C2TE characteristics that can work in outdoor areas.

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.

SIKA SOLUTION

SikaCeram®-205 Large: Cementitious adhesive consisting of high quality cements, selected silica/quartz sands and specific additives with a high polymer content. It is suitable for tiling facades and for indoor areas.
