Water Drainage System **FlexoDrain**
Complete Tunnel Water Drainage System
Resistant to Damage from Spraying
Bendable and flexible
Complete drainage system
Complete tunnel water drainage system based on channel and selected components.
Application: Primary water drainage in tunnels and mines.

Timesaving installation
Large sidestrips for easy mounting with nail gun.

Form W

Resistant
Synthetic channel with mesh reinforcement for easy sprayed coverage.

SikaSwell® S-2
SikaSwell® S is an extrudable water swelling sealant which expands when exposed to water.
The resultant pressure increases the path for water penetration, and effectively seals the joint.
