BUILDING TRUST

MALL OF ARABIA IN JEDDAH, SAUDI ARABIA

PROJECT DESCRIPTION

“Mall of Arabia” a pearl in a long string of purchasing paradises in the Saudi harbor town of Jeddah. A total of 330 outlets – including many of the top designer stores – and 34 restaurants offer the ultimate in shopping seduction. The concept adopted for the Mall of Arabia includes an integral souk in the traditional style with typical local fare.

PROJECT REQUIREMENT

Project specification required high performance, polymer modified, water-resistant, cementitious, flexible tile adhesive for thin bed application with high ultimate strength.

SIKA PRODUCTS

SikaCeram® tile adhesive and tile grout for 260,000 m²:

- SikaCeram®-202 Grey
- SikaCeram®-502TG

PROJECT SOLUTIONS

Owner and consultant chose between two systems. The samples presented by Sika convinced the client to select SikaCeram®:

- Quality was the main decisive factor to chose the Sika solution.
- Sika also met contractor’s requirements in regards to prices and strong technical support.
