BUILDING TRUST

# KONET MEAT PROCESSING PLANT, TURKEY

## PROJECT DESCRIPTION

Project name: Konet Meat Processing  
Plant location: Konya, Turkey  
Construction year: 2014  
Size in m<sup>2</sup>: 15,000

Konet is a major meat processing and trading company in the middle of Turkey. The company invested on the large production complex in Konya.

## PROJECT REQUIREMENTS

The client's main request was a solution which fulfils the requirements for modern meat production facility. The floor area is huge and divided into different areas which have different stresses, so the floor systems should offer different texture and thickness options. The most important was that the solution should have certification and approval for food and personnel safety for Food&Beverage industry.

## SIKA SOLUTIONS

**Flooring systems:** Sikafloor® PurCem® HM-20 (8,000 m<sup>2</sup>), Sikafloor® PurCem® HS-21 (7,000 m<sup>2</sup>), Sikafloor® Pro 3 i-cure.

The stresses and requirements of the facility in each area were analyzed and the floor system was selected based on the customer's preference for each room. Sikafloor® PurCem® PU hybrid flooring systems fulfilled completely the client's expectations. The performance and suitability of Sikafloor® PurCem® systems could be confirmed by the complete certification and international track record.
