FLOORING REFURBISHMENT AT NOVANDIE YOGHURT FACTORY, FRANCE

FLOORING: Sikafloor® PurCem®HS-21 Gloss

BUILDING TRUST

PACKAGING AND STORAGE AREAS IN A DAIRY FACTORY

PROJECT DESCRIPTION

Novandie Yoghurt Factory in France needed to have its packaging zone and logistics area floor renovated in the dairy factory in 2015.

PROJECT REQUIREMENT

Due to heavy traffic and high wear the old epoxy flooring had serious damages. Especially the scratches and tyre marks from forklifts had made the floor look dull. The owner was looking for a hard, good mechanical and scratch resistant floor system which has short downtime and could be applied over the weekend.

SIKA SOLUTIONS

Flooring systems for the refurbishment:
Sikafloor® PurCem®HS-21 Gloss which is smooth, hard wearing and easy to clean. Sikafloor® PurCem®HS-21 fulfils the functional requirements requested by the owner. In addition, as fast curing and non tainting product, the application of the Sikafloor® PurCem® was able to be done during the normal factory operation and at a weekend.

PROJECT PARTICIPANTS

Project owner: Andros Group

Sika organization: Sika France S.A.
