

SIKA AT WORK

FLOOR REFURBISHMENT FOR PERDIGAO EMPLOYEE CAFETERIA, BRASIL

FLOORING: Sikafloor® PurCem® HM-20

BUILDING TRUST

PERDIGAO EMPLOYEE CAFETERIA

PROJECT DESCRIPTION

Project name: Perdigao slaughterhouse employee cafeteria

Location: Rio Verde, Brazil

Construction year: 2011

Size in m²: 2,000

Company Perdigao operates one of the largest slaughterhouse for poultry and pork meat in Rio Verde, with daily output 400,000 chicken and 6,000 pigs. The plant's employee cafeteria which is open 24 hours a day and has above 8,000 customers each day had an excessively worn out tile floor. The client wanted to refurbish the floor.

PROJECT REQUIREMENT

Important was a fast application which means as short downtime as possible. The new flooring should be able to be installed directly on the old tile floor without removing all the tiles. The floor should have ability to withstand daily cleaning and extreme wear abrasion stress from trolleys, dragging tables and chairs. The applied material should have no odor during application because the other part of the cafeteria was still in operation.

SIKA SOLUTIONS

Flooring systems for the renovation: Sikafloor® PurCem® HS-21, Sikafloor®-29 PurCem®

After the approval of the test area, Sikafloor® PurCem® HS-21 was applied step by step according to the plan. Sikafloor® PurCem® hybrid technology offers odorless and environmental friendly application. With appropriate substrate preparation the product can be installed on existing tile floors fast and reliable.

PROJECT PARTICIPANTS

Project owner: BRF S.A. (Perdigao)

Contractor: Assessortec Industrial Flooring

Sika organization: Sika Brazil S.A.

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.
