GÜRPINAR FISH WAREHOUSE, TURKEY

FLOORING: Sikafloor® PurCem® HM-20, Sikafloor® PurCem® HS-21

BUILDING TRUST

SEAFOOD BAZAR AND WAREHOUSE

PROJECT DESCRIPTION

Project name: Gürpınar Fish Warehouse
Location: Istanbul
Construction year: 2015
Size in m²: 20,000

Gürpınar Fish Warehouse and Bazar project is constructed on an artificial ground that is approximately 220,000 m². It has 60,000 m² of confined space. The architecture has a venue setup that serve to publicize fishing culture and ecological niche. The Gürpınar Fish Warehouse aims to be the center of the fish trade at the European side of the City of Istanbul.

PROJECT REQUIREMENTS

For the huge and exclusive investment the client requested for a floor solution without any compromises for functionality and durability. The flooring system has to withstand thermal shock and be resistant to chemical attack from daily cleaning and operations. Sustainability and environmental friendliness were also requested. The suitability for food processing facilities of the flooring systems had to be approved by appropriate certifications.

SIKA SOLUTIONS

Flooring systems: Sikafloor® PurCem® HM-20 (freezers), Sikafloor® PurCem® HS-21 (cold rooms, corridors and trading areas).

Sikafloor® PurCem® systems are based on polyurethane hybrid technology generating extremely low VOC and having low environmental impact (e.g. Global Warming Potential). Sikafloor® PurCem® floorings are extremely durable and tough under hard wheel forklift traffic and impacts. The Istanbul City authorities were convinced by the Sikafloor® PurCem® solutions, which were tailor made for each area and its corresponding requirements in this remarkable facility.

PROJECT PARTICIPANTS
