## SUKARNE LUCERO MEAT PLANT, MEXICO

FLOORING: Sikafloor® PurCem® HM-20, Sikafloor® MultiDur ES-24

BUILDING TRUST

# LUCERO MEAT PROCESSING PLANT

## PROJECT DESCRIPTION

Project name: Lucero meat processing plant

Location: Torreon, Mexico

Construction year: 2015

Size in m<sup>2</sup>: 21,000

Sukarne is the largest meat processing company in Mexico, with more than 45 years presence in the market and export to the USA and Asia. The company works through the whole meat processing cycle from live-stock to slaughter and brings its products to trade.

## PROJECT REQUIREMENT

The main requirement of the client was the resistance to various impacts through the processing procedure and high mechanical stresses in the slaughter processing areas. The floor has to be resistant to hot water cleaning, the liquids and chemicals used in sanitation, and blood, grease and contamination from the processing. An Important criteria was to offer a trained and approved flooring applicator for the works.

## SIKA SOLUTIONS

Flooring systems: Sikafloor® PurCem® HM-20 (processing areas), Sikafloor® MultiDur ES-24 (adjacent areas).

Sukarne had already earlier used Sikafloor® flooring systems in their other plants with excellent track record. The client trusted on the already successful Sika solution package offered together with the flooring applicator GPN Pinturas y Recubrimientos.

## PROJECT PARTICIPANTS

Project owner: Sukarne

Contractor: GPN Pinturas y Recubrimientos

Sika organization: Sika Mexico
