

SIKA AT WORK

FRIGOSORNO MEAT PROCESSING FLOOR, CHILE

FLOORING: Sikafloor® PurCem® HM-20

BUILDING TRUST

FLOOR RENOVATION OF FRIGOSORNO MEAT PROCESSING AREA

PROJECT DESCRIPTION

Project name: Frigosorno Osorno

Location: Chile

Construction year: 2012

Size in m²: 1,100

Frigosorno in Chile produces and processes beef, including burgers and is a leader of meat product export to the world largest markets, including the preservation of vacuum-packed meat in freezers. The client invested in the Osorno plant for the improvement of the floors in corridors and processing areas.

PROJECT REQUIREMENT

The new flooring was to ensure the safety and quality of the production, provide hygienic environment and increase employee well-being. The important requirement from the client, which is typical to slaughter houses, was to provide a solution resistant to the sharp hanging steel hooks which may accidentally drop on the floor.

SIKA SOLUTIONS

Flooring system: Sikafloor® PurCem® HM-20

The offered Sikafloor® PurCem® system is a robust and hard-wearing polyurethane hybrid screed, which can be applied in different layer thicknesses to meet the corresponding stresses. The flooring has high impact resistance due to relatively low modulus, has good slip resistance and can withstand harsh cleaning process.

PROJECT PARTICIPANTS

Project owner: Compania Frigosorno

Contractor: Constructora Manuel Nunez

Sika organization: Sika Chile

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.
