

SIKA AT WORK

FLOOR RENOVATION FOR FOOD INDUSTRY GRANJA DEL SOL, ARGENTINA

FLOORING: Sikafloor® PurCem® HM-20, Sikafloor® PurCem® HS-21,
Sikafloor® MultiDur EB-24

FROZEN FOOD FACTORY

PROJECT DESCRIPTION

Project name: Molinos Rio de la Plata

Location: Pilar, Argentina

Construction year: 2011

Molinos Rio de la Plata is a leader in food industry with over 100 years of experience in Argentina. In Granja del Sol the processing areas of its pre-fried and frozen food factory needed to be renovated.

PROJECT REQUIREMENT

The client, at the advice of the engineering company, Eng. Bernard Stewart Usher, wanted to ensure the safety and quality of the production and build a hygienic production according to the highest industrial standards. Technically the challenge was to have flooring solutions withstanding severe chemical attack, mechanical stress, thermal shock and other impacts. The floor must also withstand constant hot water washing.

SIKA SOLUTIONS

Systems supplied: Sikafloor® PurCem® HM-20, Sikafloor® PurCem® HS-21, Sikafloor® Multi Dur EB-24

For each functional area a tailor-made flooring system was specified corresponding to the stresses in that operation and the client's preference. Sikafloor® PurCem® systems were installed in most demanding areas and the Sikafloor® MultiDur epoxy system in adjacent rooms.

PROJECT PARTICIPANTS

Project owner: Molinos Rio de la Plata

Engineer: Eng. Bernard Stewart Usher

Sika organization: Sika Argentina S.A.I.C.
