# SIKA ROOF TO FLOOR SOLUTIONS FOR NESTLÉ KUBAN' SUBLIMATE COFFEE FACTORY, TIMASHEVSK

## PROJECT DESCRIPTION

Nestlé Kuban' opened a new Sublimate Coffee factory in Timashevsk in October 2011. Now Nestlé Kuban' has become the largest sublimate coffee factory in Europe. Before the set-up of this new factory Nestlé Kuban' produced Nescafe Classic. With the new production plant Nestlé have got the opportunity to produce different sors of Nescafe Gold in addition. Sika has supplied its high quality flooring and roofing systems, protection coatings for concrete, corrosion protection coating for steel constructions.

## PROJECT REQUIREMENTS

The floors in the dry and wet production areas of the factory needed to meet the worldwide stringent hygienic standards of Nestlé. The floors should be dust-free, easy to clean, resistant to cleaning agent and abrasion. For some areas the flooring has to fulfil the special requirements such as electrical conduction and frost resistance. To meet all these requirements Sikafloor®-161, Sikafloor®-263, Sikafloor®-2530, Sikafloor®

PurCem®-20, Sikafloor® PurCem®-29, Sikafloor®-280 were applied.

The roofs of production areas and warehouses are waterproofed by Sikaplan®-15 VGWT mechanically fastened PVC System. This solution provides high quality and long term durability under the local climate condition. The steel construction is also exposed the climate therefore is protected with SikaCor® EG System.

The concrete surfaces of water treatment facilities were impregnated with Sika® Ferrogard®-903 and covered with Sikagard®-720 EpoCem and Sika® Poxitar® F.

#### Value for the Customer

- Many years experience of work with Nestlé globally and high quality systems to fulfil Nestlé's requirements
- On-site professional technical support

#### The Feedback

Mark Bushell who is the Key Project Manager for the new build Nestlé facility in Tutbury (coffee), UK had a meeting with the key people from the main contractor and consultant engineer for the system specification of the project. He presented the full Sika competence with Nestlé including a demonstration of the Nestlé Closed User Group provided by Sika Corporate.

Timashevsk project has been turned into a great success because the main contractor has been instructed by Nestlé to use the same Sika flooring systems which are specially designed for Nestlé worldwide! Furthermore, Timashevsk will be the benchmark for the Nestlé facility in UK! An additional value from Sika is that Sika supplies basement to roof solutions from one hand. The cooperation and great support to the Nestlé engineers at Timashevsk proves that Sika is the ideal partner for food manufacturing facilities.

# SOLUTIONS FOR NESTLÉ KUBAN' SUBLIMATE COFFEE FACTORY, RUSSIA
